

The Company adheres to the latest data protection regulations.

Data collected for navigation of the site

During the normal course of their functioning, the IT systems and software procedures in place to ensure the correct functioning of this internet site collect personal data related to the use of internet communication protocols.

Because of its nature, this information could, through processing or association with data held by third parties, enable identification of Users (e.g., IP address or domain name used by the User to connect to the internet).

Data acquired by this site is used for the sole purpose of extracting statistical information (and therefore the data is anonymous) on the use of the site and monitor its correct functioning. The data is canceled immediately after processing. Where there may be computer-related criminal activity targeted at the site, data necessary for determining responsibility will be kept for a period not longer than seven days.

Data provided voluntarily by the User

Personal data provided voluntarily by Users implies the subsequent acquisition of that data. Detailed information on the treatment of data (pursuant to Article 13 of Legislative Decree 196/2003) is provided in each area where personal data is potentially collected.

Cookies

This site uses cookies which are downloaded to the user's hard disk only after authorization is provided. Almost all browsers are automatically configured to accept cookies. This site uses both permanent cookies (i.e., they remain on the User's hard disk until expiry) and session-only cookies (i.e., automatically removed at the end of each session). The sole purpose of permanent cookies is to enable site access to be personalized by the User and to facilitate access to services that require user authentication. Session cookies are used to transmit session ID information necessary for safe and efficient navigation of the site and to avoid use of other procedures that could compromise the User's privacy. These cookies do not enable acquisition of the User's personal data.
